This fund update was first published on 16 September 2021.

What is the purpose of this update?

This document tells you how the Baptist Union Superannuation Scheme (*Scheme*) has performed and what fees were charged. The document will help you to compare the fund with other funds. Baptist Retirement Trustee Limited (the Trustee and Manager) prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Scheme does not offer investors a choice of funds.

The Scheme has a target investment mix of 50% growth assets and 50% income assets.

The investment objectives for the Scheme are:

1. to achieve a net investment return at least 1.5% p.a. above the rate of CPI increases over every 5 year period;
2. to manage investment risk so that negative gross returns are on average expected to occur no more often than 1 year in 4; and
3. that the benchmark return matches or exceeds the return of the capital market index against which the performance of the cash asset class is monitored plus 1.0% p.a. over rolling 5 year periods.

Total value of the Scheme:	\$33,782,887
Number of investors in the Scheme:	263
The date the Scheme started:	19 November 1992

What are the risks of investing?

Risk indicator for the Scheme:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past Year
Annual return (after deductions for charges ¹)	8.46%	12.32% pa
Market index annual return (reflects no deduction for charges and tax)	8.36%	11.07% pa

The market index return is the weighted average of the capital market indices as defined in the Statement of Investment Policy and Objectives (SIPO), where the weights are equal to the benchmark asset allocation set out in the SIPO. A copy of the SIPO is available at www.angfincare.nz/buss/ or on the offer register at the Companies Office www.disclose-register.companiesoffice.govt.nz/ under Baptist Union Superannuation Scheme.

Annual Return Graph

This shows the return after fund charges and tax for each of the last 10 years ending 30 June. The last bar shows the average annual return for the last 10 years, up to 30 June 2021.

Important: This does not tell you how the fund will perform in the future.

What fees are investors charged?

Investors in the Scheme who are Class A members are charged fund charges. In the year to 30 June 2021 these were:

	% of net asset value
Total fund charges	1.34%
Which are made up of:	
Total management and administration charges	1.34%
Including:	
Manager's basic fee	0.77%
Other management and administration charges	0.57%
Total performance-based fees	0.00%
	Dollar amount per investor
Other charges	\$0

Class A members are not charged prescribed fees. Instead the Manager recovers all costs and expenses for trusteeship, administration, insurance and investments from the Scheme's assets. See the Costs and Expenses section of the Other Material Information document at www.angfincare.nz/buss/ or on the offer register at www.companiesoffice.govt.nz/disclose for more information about these fees.

Investors in the Scheme who are Class D members are not charged fund charges.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

John had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, John received a return after fund charges and tax were deducted of \$1,232.00 (that's 12.32% of his initial \$10,000). John did not pay any other charges. This gives him a total return after tax of \$1,232.00 for the year.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the Scheme invests in.

Target investment mix

This shows the mix of assets that the Scheme generally intends to invest in:

Top 10 investments

Name	% of Fund net assets	Type	Country	Credit Rating (if applicable)
Nikko AM Wholesale Global Bond Fund	25.25%	International fixed interest	NZ	
Nikko AM Wholesale Global Shares Fund	19.90%	International equities	NZ	
Nikko AM Wholesale SRI Equity Fund	17.15%	Australasian equities	NZ	
Nikko AM Wholesale NZ Bond Fund	15.67%	New Zealand fixed interest	NZ	
Nikko AM Wholesale Global Shares Hedged Fund	11.90%	International equities	NZ	
Nikko AM Wholesale Property Fund	5.57%	Listed property	NZ	
Nikko AM Wholesale NZ Cash Fund	4.56%	Cash and cash equivalents	NZ	

The top ten investments make up 100% of the fund.

Currency hedging

The currency risk benchmarks and ranges for the extent to which various asset classes are hedged to the New Zealand dollar are as follows:

- international fixed interest portfolio: 100% hedged benchmark at all times
- international equities portfolio: is an essentially “neutral” 50% hedged position, and achieved by splitting the benchmark exposure between hedged (10%) and unhedged (17.5%).
